

This image shows a vibrant educational interface for a math game. The top portion is a yellow control panel with various mathematical symbols: a globe, a plus sign, a circle, and a square. Below these are several rows of empty boxes for calculations, with some containing numbers like 10, 5, 15, and 30. A central calculator-like interface includes a display showing '10', a pencil icon, and a checkmark. The bottom section is a large grid of geometric shapes (circles, squares, triangles) arranged in a pattern. A path is highlighted in green and yellow, starting from a red circle in the center and moving towards a blue circle. A sidebar on the right features a character, a score display, and navigation buttons.

This image is an identical copy of the educational interface described above. It features a yellow control panel with mathematical symbols, a central calculator-like interface, a large grid of geometric shapes with a highlighted path, and a sidebar with a character and navigation elements.
